

ARC WELDING DATA LOGGING AND MONITORING SYSTEM

Partek is the only North American company with proprietary rights from The Validation Centre (TVC) for the ALX Electronic Data Logger:

The portable electronic arc welding data logger monitors and records main welding parameters such as voltage, current, wire feed speed, travel speed, gas flow, and temperature, allowing Partek clients to produce reports detailing the average values for all parameters plus heat input calculations.

Partek sells, services, calibrates, and rents the ALX Electronic Data Logger with or without Partek operators.

Partek sells, services, calibrates, and rents our data loggers with or without an operator.
